# SETTING UP BUSINESS IN GERMANY

## **General Aspect**

Germany is situated in the heart of Europe, bordering nine other countries. As it is part of the euro zone, its monetary unit is the Euro. With about 357,000 square kilometres Germany is one of the largest European countries. The total population is around 82.5 million people. The official language is German, but many people, especially in business life, speak English as well.

## **Legal Forms of Business Entities**

Legal form	Feature	Remarks

Sole Proprietorship	Set up by a single natural person, who is fully liable for the debts contracted by the firm with his own present and future wealth. An entry in the commercial register as a registered business person (eingetragener Kaufmann, e. K.) is necessary for merchants (a person who carries on a commercial business), no entry is necessary for freelance professionals (Freiberufler)

Partnership Com- pany (Partners- chaftsgesellschaft – PartG)	Only natural persons can be partners. The personal liability of the partners can be excluded with regard to professional errors for which one individual partner is alone responsible. ### **Taxation**

Companies in Germany are usually taxed on two levels: On the first level, corporations are subject to corporate income tax (Körperschaftsteuer), whereas partnerships and sole proprietorships are subject to personal income tax (Einkommensteuer). Both taxes are levied by the federal government. On the second level, all business operations are subject to the trade tax (Gewerbesteuer), which is imposed by the municipalities, where the company is based.

Tax	Feature	Remarks
Corporate Income Tax (Körperschaftsteuer)		
Trade Tax (Gewerbesteuer)	All commercial business operations, except those of freelance professionals, are subject to trade tax with regard to their taxable earnings. The trade tax burden depends on the tax assessment rate (Gewerbesteuer-Messbetrag), which is 3.5%, and the trade tax collection rate (Gewerbesteuer-Hebesatz) levied by every municipality. The taxable earning, multiplied by the collection rate, gives the trade tax bases amount, which is multiplied by the applicable municipal collection rate.	resulting in a minimum total trade tax burden of 7%. Frankfurt/ Main and Munich have municipal collection rates of 490%, the average rate is somewhere between 350% and 400%.
Personal Income Tax (Einkommensteuer)	The rate of personal income tax starts at 14% for an annual income exceeding the tax-free allowance of EUR 9.000,00. It rises progressively to a maximum personal income tax rate of 42%, which is applicable to earnings of EUR 54.950,00 or more. An increased tax rate of 45% applies to every euro in excess of EUR 260.533,00 per year, except business profits. The personal income tax can be reduced by 3,8 times of the trade tax base amount.	
Personal Income Tax in case of partner- ships	As partnerships are not separate legal entities but associations of partners, the partners themselves generally are subject to the personal income tax, with the individual tax rate applicable to each shareholder. In order to achieve a tax burden neutrality between partnerships and corporations, the personal income tax rate applicable to retained earnings (thesaurierte Gewinne) of a partnership is limited to 28.25%. After distribution to the partners, the distributed earnings are subject to a subsequent taxation of 25%.	

Compensation Tax (Abgeltungssteuer)	Since 2009 all dividends, capital interests and speculation gains are subject to the compensation tax with a tax rate of 25%.	If the individual income tax rate is less than 25%, the taxpayer can request that his individual tax rate has to be applied.
Solidarity Surcharge (Solidaritätszus- chlag)	The solidarity surcharge, introduced to finance the German reunification, is 5.5% of the assessed amount of both corporate and personal income tax. No solidarity surcharge is levied on trade tax payments.	
Value Added Tax (VAT) (Umsatzsteuer)	The normal VAT rate is 19%, a lower rate of 7% is charged for convenience goods and services needed on a day-to-day basis, such as food, books and newspapers, or public transport. Some services, including banking, healthcare, and non-profit work, are VAT-exempt. For certain services rendered by a foreign entrepreneur, the reverse-charge-system has to be applied.	Each entrepreneur can apply for a VAT-Identification-number, which is particularly necessary for intra-EU supplies and services. Import turnover tax (Einfuhrumsatzsteuer) has to be paid for goods imported from non-EU states.
Real Estate Trans- fer Tax (Grunderwerbsteuer)	When domestic real estate changes owner, a one-time real estate transfer tax of about 3.5% to 6.5% (depending on the federal state –"Bundesland") of the purchase price has to be paid, usually by the buyer.	
Real Property Tax (Grundsteuer)	Every property owner in Germany is annually liable to real estate tax. The tax rate depends on the category of real estate, the assessed value of the property and the municipal collection rate (Hebesatz).	
Church Tax (Kirchensteuer)	Individuals who belong to a recognised church and who are subject to unlimited taxation in Germany must pay church tax (Kirchensteuer). Depending on the federals state of residence, the church tax rate is 8% or 9% of the individual's income tax. Church tax paid is deductible for income tax purposes.	
Non-resident Ta- xation	Non-resident individuals and companies in Germany receiving income generated in Germany, are subject to German limited taxation with their German-sourced income. Double taxation of this income is avoided by double taxation agreements between Germany and other countries. In case of a non-resident company the tax treatment depends on its kind of income.	
	For individuals the deduction of expenses is only allowed if and to the extent these expenses are economically related to the taxable revenues. These limitations put taxpayers with a limited tax liability in Germany in a disadvantageous position compared with individuals who are subject to unlimited German taxation.	
	However, individuals who are subject to limited taxation in G worldwide income is subject to German taxation in one year.	Sermany can apply for unlimited taxation if at least 90% of their
